## **Influence: the ultimate power tool**

What does scientific research tell us about the persuasive approaches that make people most likely to say yes to requests? How can we use this research ethically and effectively? Dr. Robert Cialdini, author of the ground-breaking book, *Influence*, is your guide, translating the scientific research into practical business applications. His widely acclaimed studies are highly instructive to those who want to be more influential. Weaving compelling stories with evidence-based statistics makes this program memorable and immediately applicable. Here, Dr. Cialdini identifies and explains the universal principles of persuasion that move others toward yes.

## **Influence during times of uncertainty**

In today's uncertain environment, the need for simultaneously effective and ethical influence is necessary, pertinent, and now more vital than ever to our success. During this profound presentation, Dr. Robert Cialdini briefly reviews his research-based universal principles of influence, but focuses on those that are most effective during conditions of uncertainty and that leaders can employ to bring about positive and lasting change among individuals located both inside and outside their organizations. Dr. Robert Cialdini is your guide in translating highly relevant but poorly-understood scientific research into practical business applications.

## **Leadership through the power of persuasion**

It is through the influence process that we lead, generate, and manage change. It can be employed to foster growth and to move people away from negative choices and in more positive directions, thereby creating the conditions for new opportunities. Or, it can be used clumsily, reducing the chance for genuine movement and, in the worst of cases, boomeranging into conflict and resentment. Fortunately, a vast body of scientific evidence now

exists on how, when, and why people say yes to influence attempts. Dr. Robert Cialdini extracts from this formidable body of work the universal principles of influence - those that are so powerful that they generate desirable change in the widest range of circumstances.
