PROGRAMAS

Boost Employee Performance through Self-Healing

Business leaders are intimately aware of the risks to their organizations and the triple threat of dramatically rising healthcare cost increase, absenteeism, and the lack of productivity in the workplace. To be effective, employee awareness and participation must be encouraged

on a day-to-day, month-to-month basis. It is a function that can and will pay enormous dividends.

In this ground breaking presentation, Dr. Fabrizio Mancini shares his knowledge on how employees and organizations can tap into naturally available self-healing capacities to reverse the disastrous upward trend of healthcare costs spiraling out of control.

Servant Leadership

Servant leadership is both a leadership philosophy and set of leadership practices. Traditional leadership generally involves the accumulation and exercise of power by one at the top of the organizational chart; in contrast, the servant-leader shares power, puts the needs of others first, and helps people develop and perform as totally fulfilled as possible in their capacity.

Servant leadership is a timeless concept, first coined by Dr. Robert Greenleaf in his essay The Servant as Leader. In this powerful presentation, Dr. Fabrizio Mancini shares his knowledge on how to instill the foundational principals of those that take a "serve-first" approach to business and life.
